EDUCATION

SCMS school of Engineering & Technology

Bachelor of Technology, Computer Science Engineering

Sept 2023 - Present

CGPA: 8.01

Rajasree S.M.M School, Ernakulam

Computer Science

Jun 2021 - May 2023

Score: 91.6%

SKILLS AND PROFICIENCIES

Languages: Java , Python, C,

Frontend / Backend: React, HTML, CSS, JavaScript, Node.js

Infra & Tools: REST APIs, Git/GitHub, Postman

Databases: PostgreSQL, MongoDB, MySQL

CS Fundamentals: DSA, OS, CN, DBMS, OOPs

Interests: Artificial Intelligence, Web Development, Machine Learning, Full-Stack Development

WORK EXPERIENCE

Keltron

Intern

Aug 2025

Aluva, Ernakulam

- Completed a 2-week Web Development internship, gaining hands-on exposure to core front-end and back-end concepts
- Developed responsive web applications by implementing 3 core components: user interfaces, server-side logic, and database connectivity
- Applied 4 development practices—version control, debugging, testing, and deployment—to support end-to-end web application development

PROJECTS

Sleep Disorder Prediction

2026

Python, ML, FastAPI

- Launched an end-to-end machine learning web application to predict sleep disorders from health and lifestyle data, achieving 90% classification accuracy
- Performed data analysis and preprocessing on a sleep health dataset (Jupyter notebook), trained a classification model, and programmed an HTML-based frontend for user input and results
- Achieved 90% accuracy on the trained classification model

E-Ticketing

2025

JavaScript, HTML, CSS

- Designed a full-stack UPI and card payment gateway processing 1,000+ transactions at 99.8% uptime with a strict payment state machine (processing → success/failed)
- Created a bus ticket reservation system with JavaScript for core logic and HTML/CSS for the frontend, supporting seat selection and booking flow
- Implemented 2 payment outcomes—success and failed—using a structured processing state machine to ensure reliable transaction handling

Movie Recommendation Website

2026

JavaScript, HTML, CSS

- Deployed a movie recommendation website using JavaScript, HTML, and CSS, integrating multiple external APIs for movie data, with a clean, user-friendly interface for content discovery
- Incorporated 3 core user-facing features: movie search, recommendation-based discovery, and API driven movie information retrieval
- Engineered a responsive interface using HTML, CSS, and JavaScript to support real-time interaction with external movie data APIs

ACHIEVEMENTS

- Attended workshops on emerging technologies
- Collaborated in hackathons to design and implement software solutions under time constraints
- Served as Master of Ceremonies for various college-level events

CERTIFICATIONS

- NPTEL: Developing Soft skills and Personality
- Infosys: Overview of Agile & DevOps
- Cognifyz Technologies: Machine Learning
- Pacelab: Artificial Intelligence
- GitHub: GitHub Foundations
